

## Questions about debris collection?

✓ Here are some quick tips to get your debris cleared efficiently. Remember, Precinct 3 crews are making at least three passes through unincorporated areas.

After Storm Debris

# QUICK TIPS: DEBRIS MANAGEMENT

Sorting is key for vegetative, construction, and demolition debris, including fencing.

Piling debris together reduces collection stops.

Please ensure your debris is set out curbside.

When setting out loose debris, please use CLEAR bags only.

Black-bagged debris will not be collected during disaster debris pickup.

- Team up with your neighbors. The bigger the pile, the faster the pickup. Piling debris together reduces collection stops.

## Did you bag your debris? No worries!

- We will pick up clear bags of debris.
- If you used black bags for your debris, simply remove the contents and place them loose at the curb for collection. Remember, black-bagged debris won't be collected with disaster debris (because the contents cannot be determined).
- Alternatively, set the black bags aside for regular trash pickup. Check with your trash company to verify accepted materials and bag limits.
- White goods, electronics, and appliances will require proof of registered storm damage for pickup.
